73 # NOTES
74 # =====
75 # 1. MongoDB URI must include connection pool settings for production
76 # 2. Upstash Redis is required for rate limiting and caching
77 # 3. Change ADMIN_SECRET_KEY to a random, strong value
78 # 4. Update ALLOWED_ORIGINS with your actual domain
79 # 5. Keep this file private - never commit to git
80 # 6. Rotate credentials regularly in production
81
